

A differentiated model for *alpha generation*.

Two structural advantages set CR17 apart from conventional growth equity — one built into the capital structure, the other into the operating model.

01 Disciplined & Patient Capital Direct ownership. No layered fees. Built for alignment. The Anchor Discipline 50% Minimum anchor / cornerstone allocation targets must commit in exchange for CR17's pre-IPO investment. → De-risked IPO for targets · shorter lock-up for LPs • Direct equity only. No structured products, fund-of-funds, or access-for-fee vehicles — APC Growth Equity Fund owns the underlying assets directly. • Full fee transparency. Zero duplicative management fees or performance drag from intermediary intermediary layers / vehicles.	02 Overseas Commercialization Partnership Beyond capital: unlocking Western markets. The Commercialization Engine Portfolio Co. China CR17 Co-Investment Offshore JV Active commercialization End Clients North America & Europe Powered by Chinney Group · Wong Family · Cha Family networks • Decades-old distribution. Sales networks and client relationships across developed markets Chinese companies rarely crack alone. • Hands-on execution & funding. Not introductions — CR17 will co-invest and actively operate the offshore JV to help target commercialize their products in new markets.
---	--

"Capital that opens doors — not just writes checks."

The differentiation, *quantified.*

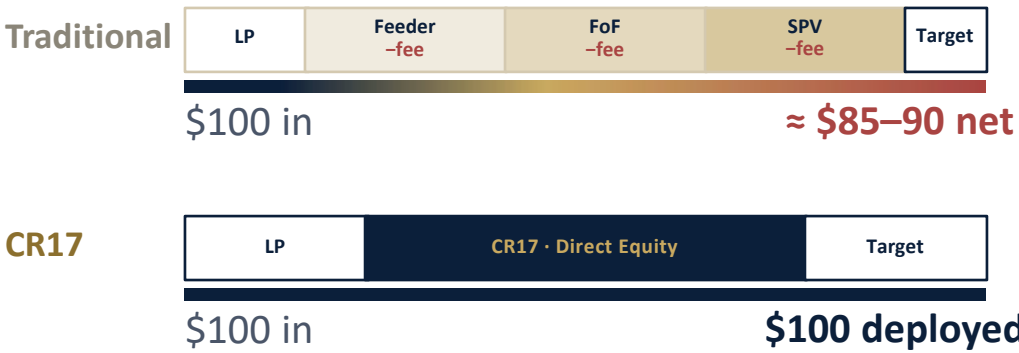

Cleaner economics · faster liquidity · active commercialization — the three ways CR17 outperforms the market standard.

01 Capital Structure

Fewer layers between LP and asset.

Fee drag on \$100 of LP capital

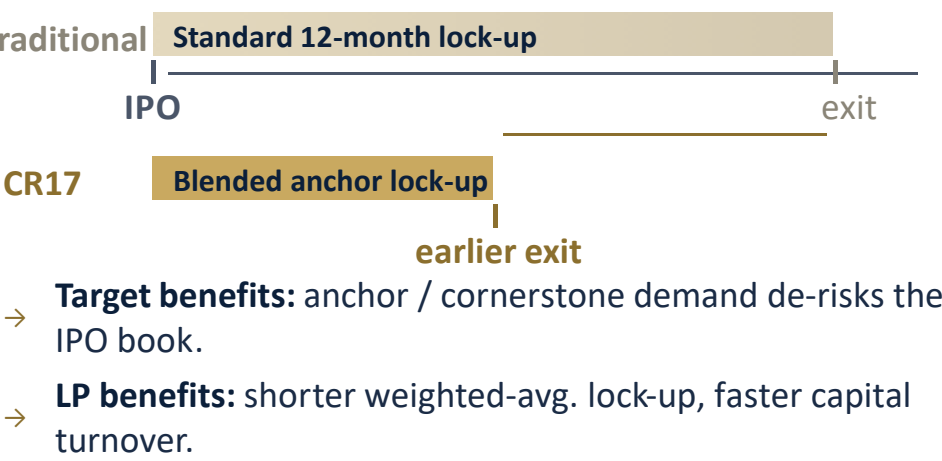

Result: Full fee transparency and direct ownership — zero performance drag from intermediary layers.

02 Allocation Discipline

Anchor / cornerstone access.
Compressed lock-up.

Path to liquidity

Result: A self-reinforcing loop — patient capital that still delivers accelerated exit optionality.

03 Commercialization Flow

A JV mechanic that closes the loop for overseas commercialization.

The commercialization loop

Powered by

Chinney Group · Wong Family · Cha Family
Decades-old sales networks & client relationships

Result: Funding and de-risked international expansion for targets, cornerstone economics for CR17 — a true win-win.
